Flexible electricity pricing or flat rate?

Switch On to My Power Planner and see which is best for you.

Gain an understanding of how the new flexible electricity pricing options will work with the My Power Planner tool at the Victorian Government Switch On website.

With My Power Planner you can:

- see how and when your household uses electricity

- compare electricity retail offers
- try shifting the time of day you use electrical appliances to see if you could save.

To help you make an informed decision about electricity plans appropriate to your needs, switch on to My Power Planner at switchon.vic.gov.au
